Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Feature #211

minimum buffer

November 13, 2012 17:11 - Colin Yallop

Status:	Rejected	**Start date:**	November 13, 2012
Priority:	Minor	**Due date:**	
Assignee:	Colin Yallop	**% Done:**	0%
Category:	core	**Estimated time:**	0.00 hour
Target version:	3.3.3		
Affects version:	3.3.2		

Description

allow lower buffer settings, say down to 10ms.

Experience with other media players is that lowest buffer setting without skipping gives a less veiled sound quality in high rez systems.

- Status changed from New to Rejected

Buffer size is not related to audio quality. The only drawback of a large buffer size is that you will see a larger CPU spike when first starting playback, and for any buffer size less than one second, you will probably not even notice.
