

Audacious - Bug #121

Tray icon not visible

June 07, 2012 13:09 - Marcin Kocur

Status:	Rejected	Start date:	June 07, 2012
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:	plugins/statusicon	Estimated time:	0.00 hour
Target version:			
Affects version:	3.2.2, 3.2.3		

Description

After KDE 4.8.2 > 4.8.3 update there is no tray icon visible in KDE, although you can use it as well as it was there. So right-click menu works, mouse wheel scroll over works, it takes place between other icons, but the very graphics is not visible.

I removed ~/.config/audacious and checked version 3.2.2 and 3.2.3. It's probably KDE's fault but please, do some workaround :)

History

#1 - June 07, 2012 13:10 - Marcin Kocur

Audacious's icon in the screen should be placed between white kmail's icon and yellow psi icon.

#2 - June 09, 2012 03:14 - John Lindgren

- Status changed from New to Rejected

We just use GtkStatusIcon, so there's not really much we can do. Sorry.

#4 - June 09, 2012 17:53 - Thomas Lange

Did you try updating the icon cache?

#5 - June 11, 2012 21:01 - Marcin Kocur

You mean kbuildsysoca4? Then yes.

#6 - June 13, 2012 23:55 - Thomas Lange

No, I did not mean kbuildsysoca4.

Try running:

```
update-desktop-database -q
```

```
gtk-update-icon-cache -q -t -f /usr/share/icons/hicolor
```

#7 - June 14, 2012 17:36 - Marcin Kocur

It recreated icon-theme.cache but icon is still invisible.

#8 - June 14, 2012 20:26 - Marcin Kocur

Funny enough, I was using nouveau. Now switched back to nvidia binary driver and icon is there.
