Affects version:	3.9		

Description

Open audacious in qt mode: audacious --qt
Then try audacious -m

I managed to fix this problem by using audacious -m --qt && wmctrl -a audacious

The show-main-window option does not work with the qt version. It DOES work with GTK version on a KDE system though.

KDE NEON 64bit 5.11.5 KDE Framework Version 5.42.0, QT Version 5.9.3
Audacious 5.9 (stable)
