Description

Most songs' titles in Lyricswiki have this format: "Title" featuring Singer/Group, where featuring is *not* part of the song's title - it's just an extra informational suffix.

Meanwhile songs in anyone's collection are named either: "Title feat. Singer/Group" or "Title (feat. Singer/Group)", so the lyrics wiki plugin doesn't yield any results.

Please, make this plugin strip everything in brackets, e.g.

"This is a name of a song (feat. Some Singer) [Year 2013]" should be queried as "This is a name of a song".

Thank you.

Are you saying that the songs in your music collection are tagged with titles similar to "This is a name of a song (feat. Some Singer) [Year 2013]"?

#2 - March 12, 2013 06:55 - Artem S. Tashkinov

Yes, some of them are.

Some are "This is a name of a song (feat. Some Singer)"

Others are "This is a name of a song (featured Some Singer)"

Then I have some songs "This is a name of a song (ft. Some Singer)"

#3 - March 13, 2013 00:05 - John Lindgren

- Tracker changed from Bug to Feature

- Target version deleted (38)

- Affects version deleted (3.0, 3.0.1, 3.0.2, 3.0.3, 3.0.4, 3.1, 3.1.1, 3.2-alpha1, 3.2-beta1, 3.1.2, 3.2-beta2, 3.2, 3.2.1, 3.2.2, 3.2.3, 3.3-alpha1, 3.2.4, 3.3-beta1, 3.3-beta2, 3.3, 3.4, 3.3.1, 3.3.2, 3.3.3, 3.3.4, 3.4-alpha1)

An option could be added for this. It wouldn't do to make it the default behavior, though, since that would break song titles that legitimately contain parentheses.

#4 - March 13, 2013 09:12 - Artem S. Tashkinov

I'm only asking this thing to be implemented only ...

"if it cannot find the lyrics for the original title".

#5 - July 10, 2016 07:03 - John Lindgren

- Status changed from New to Rejected

No plans to implement this currently. Probably better for it to be implemented on the server side anyway.
