Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #136

modplug plugin includes sys/mman.h but it doesn't seem to need it.

June 23, 2012 12:10 - Carlo Bramini

Status:	Closed		**Start date:**	June 23, 2012
Priority:	Minor		**Due date:**

Target version:	3.2.4			
Affects version:	3.2.3			

Description

The file:

src/modplug/archive/arch_raw.cxx

includes sys/mman.h but it does not seem to be required.
Instead, it looks like that there are not sources using mmap() and unmap() stuff and this file is the only one that it includes it.
Actually, the inclusion of this file breaks the compilation of the plugin: if it is not required by some platform or for some reason, it would be better to remove it or at least make it conditional.

On previous version, I was able to make it working by simply removing that line; on newer version in the repository, I do not know what it happens, since I'm still trying to make working GTK+3 on my mingw+msys.

History

#1 - June 24, 2012 14:16 - John Lindgren

- Category set to plugins/modplug

- Status changed from New to Closed

- Target version set to 3.2.4

- % Done changed from 0 to 100

- Affects version 3.2.3 added

Fixed.
