Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #782

audacious -u on Raspberry Pi

March 30, 2018 15:17 - Ulrich Lauther

Status:	Rejected	**Start date:**	March 30, 2018
Priority:	Major	**Due date:**	
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			
Affects version:	3.6.2		

Description

I use
audacious -H mymusic.mp3 &
to play mymusic.mp3 and
audacious -u
to stop playing.
This works fine on a Intel(R) Atom(TM) CPU N455

However, on a Raspberry Pi, playing works, but "audacious -u" gives a lot of error messages,
or - to be exact - warnings, about leaking strings and the music is NOT stopped.

Both computers run Ubuntu 16.4

History

Are you really using Audacious 3.6.2? That is a pretty old version, and we don't support it any more. I'd suggest trying a newer version to see if you still have the same problem.

#2 - June 30, 2018 02:12 - John Lindgren

Closing this report since it applies to an old, unsupported version. Please open a new report if the problem still exists in 3.9.
