.2sf files not pointed to correctly

Affects version:	3.3		

Description

Trying to play a .mini2sf results in an error message that states the file cannot be found. The directory listed is incorrect, having the last folder missing from the /path/to/the/file.obj. It would display "/path/to/file.obj", missing the "the/" folder. I was even able to get it to play by copying a folder's contents, and pasting it one directory above.

I have just installed audacious and audacious-plugins v3.3 from arch linux repository. Provided is a sample folder of .2sf that worked in version 3.2.x.
