

Audacious - Bug #188

Seeking using the GUI is broken in 3.2.4

September 30, 2012 18:59 - Artem S. Tashkinov

Status:	Rejected	Start date:	September 30, 2012
Priority:	Major	Due date:	
Assignee:		% Done:	0%
Category:	plugins/gtkui	Estimated time:	0.00 hour
Target version:			
Affects version:	3.2.4		
Description			
In previous versions of Audacious you could click any part of the song progress/seek bar and Audacious would jump to this position.			
In 3.2.4 it doesn't work - you have to drag a seek knot to a position you're interested in which is absolutely inconvenient.			
Please, add back the removed functionality.

Which means CentOS users are f*cked because you removed a workaround for old GTK versions and now we have to use mouse middle click which is also bloody inconvenient.

#3 - October 04, 2012 16:40 - Artem S. Tashkinov

What patch should I revert to get the old behavior back?

It's utterly irritating to use the middle mouse button to jump to a new position in a song.

#4 - October 04, 2012 17:12 - Artem S. Tashkinov

- File `audacious-3.2.4-scroll_with_left_mouse_button.patch` added

Here's a patch to make Audacious behave itself again.

#5 - March 06, 2015 04:05 - John Lindgren

- Target version deleted (38)
