Affects version:				

Description

Hi!

I often use an alarm clock in Audacious. But in order to activate it, I do a lot of action:
1. File
2. Settings
3. Modules
4. General
5. Alarm

I want to perform fewer actions. For example:
1. Services
2. Alarm

Is that possible?

History

#1 - November 22, 2013 16:23 - John Lindgren

- Category set to plugins/alarm

Yes, that should be easy enough. I will try to get it implemented for 3.5.

#2 - November 24, 2013 05:31 - John Lindgren

- Status changed from New to Closed

- Target version set to 3.5

- % Done changed from 0 to 100
