<b>Affects version:</b>	3.4.3		
<b>Description</b>			
Hi everyone,			
this bug is driving me crazy. I am using Arch with Gnome 3.10.3 and Audacious (v 3.4.3 (Arch Linux)) configures itself as a default* inode/directory* application.			
I manually changed this editing the <code>/usr/share/applications/mimeinfo.cache</code> file but every time I restart the computer Audacious changes it back again.			
From my point of view it should be Nautilus and not Audacious which handles the inode/direcory:inode/directory=*nautilus.desktop*;anjuta.desktop;			
Thank you very much, I really like what you are doing!! Keep it up!!			
Daniel.			

#### History

##### #1 - February 16, 2014 20:04 - Mathias Lindner

The same in Manjaro.

Go to <http://forum.manjaro.org/index.php?topic=10587> for some information how to fix this for your installation.

However, this should be corrected in the source.

##### #2 - February 16, 2014 22:39 - Thomas Lange

This was initially added to fix [#102](#).

##### #3 - February 17, 2014 15:38 - John Lindgren

- Status changed from New to Rejected

Already discussed as <https://bugs.archlinux.org/task/30034>. Not a bug.

##### #4 - March 06, 2015 04:06 - John Lindgren
