Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #446

MP3 length estimate inaccurate

May 21, 2014 03:35 - Anonymous

Status:	Closed		**Start date:**	May 21, 2014
Priority:	Minor		**Due date:**	
Assignee:			**% Done:**	100%
Category:	plugins/mpg123		**Estimated time:**	0.00 hour
Target version:	3.6			
Affects version:	3.5			

Description

On some mp3's (maybe also other formats) I get wrong track lengths displayed. It appears this happens with specific types of mp3 files, since when it happens, it happens for the whole Album.

For reproducibilty I have uploaded an mp3 file which is actually 3:15 min long but Audacious shows 3:30 min.

This happens independent of the OS.

History

#1 - May 26, 2014 17:26 - John Lindgren

- Subject changed from Wrong track length to MP3 length estimate inaccurate

- Category set to plugins/mpg123

- Status changed from New to Closed

- Target version set to 3.6

- % Done changed from 0 to 100

Without a Xing header, mpg123 is only estimating the length of the MP3 file. In 3.6 there will be an option to read the entire MP3 file and calculate the length exactly:
