<b>Category:</b>	plugins/ffaudio	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	3.6.2		
<b>Affects version:</b>	3.6.1		

#### Description

I am running Audacious 3.6.1 under Slackware 64bit. I have noticed that audacious plays untagged True Audio (TTA) files perfectly using the ffaudio plugin; a sample here:

[http://www.andrews-corner.org/samples/luckynight\\_untagged.tta](http://www.andrews-corner.org/samples/luckynight_untagged.tta)

But audacious fails with tagged TTA files; a tagged sample here:

[http://www.andrews-corner.org/samples/luckynight\\_tagged.tta](http://www.andrews-corner.org/samples/luckynight_tagged.tta)

The commandline output shows that audacious is attempting to use mpg123 and thus fails:

```
andrew@ilium~$ audacious -H luckynight_tagged.tta
```

```
ERROR mpg123.cc:238 [read_tuple]: mpg123 probe error for file:///home/andrew/luckynight_tagged.tta  
: Message: I am done with this track.
```

```
ERROR interface.cc:120 [aud_ui_show_error]: Error opening file:///home/andrew/luckynight_tagged.tta  
a:
```

```
Error reading metadata
```

If the mpg123 plugin is disabled via the gui audacious uses the ffaudio plugin and reads the mete data correctly and plays the file perfectly.

Please let me know if more information is required.

#### History

##### #1 - April 19, 2015 16:33 - John Lindgren

- Category set to plugins/ffaudio
- Status changed from New to Closed
- Target version set to 3.6.2
- % Done changed from 0 to 100

Fixed.

##### #2 - April 22, 2015 11:39 - Andrew Strong

Thank you :).
