

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #618

scrobbler complains of network problem when checking permission

January 23, 2016 13:42 - Götz Waschk

Status:	Closed	Start date:	January 23, 2016
Priority:	Major	Due date:	
Assignee:		% Done:	100%
Category:	plugins/scrobbler	Estimated time:	0.00 hour
Target version:	3.7.2		
Affects version:	3.7.1		

Description

This is with audacious 3.7.1 on Mageia Linux. The scrobbler doesn't submit to last.fm, When I try to check the permissions, I'm getting network problem, but <http://status.last.fm/> says that submissions are OK. The scrobbler plugin was linked with curl and OpenSSL.

History

#1 - February 05, 2016 15:23 - Andreas Kirchwitz

With Audacious 3.7.1 on Fedora 23 (Linux, 64 bit) I did the initial authentication to allow access. The browser opens and access is granted to Audacious successfully.

But the button to check scrobbling permissions (plug-in settings) always results in a network problem. No further messages are given what went wrong.

So I can verify the bug mentioned in this ticket.

However, scrobbling itself works just fine. It's only the permissions check that fails. Confusing.

#2 - February 12, 2016 20:13 - Ali Baba

I can confirm this bug. Version 3.7.1 on Arch 64.

#3 - February 13, 2016 07:46 - John Lindgren

- Subject changed from *scrobbler not working* to *scrobbler complains of network problem when checking permission*

#4 - February 20, 2016 15:58 - Mihai Tiganus

I can confirm this bug on Ubuntu 14.04. But in my case it doesn't scrobble at all.

#5 - February 21, 2016 19:06 - John Lindgren

- Status changed from *New* to *Closed*

- Target version set to *3.7.2*

- % Done changed from *0* to *100*

Last.FM appears to have removed part of their API (the `user.getRecommendedArtists` request). If they continue to make changes like this without warning, we may stop including a scrobbler plugin with Audacious.

#6 - February 22, 2016 00:00 - Thomas Lange

John, have you not been notified about the pull request [1] by Mihai Tiganus? It contains an additional fix for a OpenSSL/curl bug.
