<b>Affects version:</b>	3.8		
<b>Description</b>  Hello, I have built audacious from the last stable source and from git When I try to open a folder that contains both a cue sheet and the corresponding flac or ape files I get a segfault. If I go inside the folder and select the *.cue file it plays fine. For many years audacious has been my default audio player Keep the good work ! regards joaquin

- Category set to libaudcore
- Status changed from New to Closed
- Target version set to 3.8
- % Done changed from 0 to 100

Whoops, that was caused by my recent cuesheet improvements in Git master. The stable branch (3.7.x) is not affected.
