Affects version: 3.8.1	

Description

hello people i have problem with audacious in windows 10, i have audacious 3.9, i use with gtk version.

When I drag and drop some music file (one or more) I get the cursor that can not, can not be assigned as a default program and lastly by inserting some removable device (mp3, sd, pendriver ..) in the menu " File ", " open file "does not display, and does not let the path access manually.

so sorry my bad english (i use google traslated because my native speak is spanish)
thanks

- Status changed from New to Rejected
- Target version deleted (3.9)
- Affects version deleted (3.8.2, 3.9)

There is no Audacious 3.9. The newest version is 3.8.1.

Drag and drop, opening files on the command line (as a default program), and File -> Open all work for me. You will have to do more research to find out why it is not working on your system.
