Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Feature #709

Can't access equalizer preset settings from GTK interface

Description

On my distro, Audacious uses the GTK interface by default (not sure what the upstream default is). When transcribing basslines, it's often helpful to me to use graphic equalizer presets to switch back and forth.

I couldn't find such a feature, nor documentation, so I searched the web and eventually, by trial-and-error, found that from the Winamp interface, presets are easily available.

It seems strange that functionality differs by interface, so it would be great if equalizer presets were available from the GTK interface as well.

If I've missed something, e.g. "all proper Audacious users use the Winamp interface", then fair enough, but it's a shame that the default is not the most feature capable.

- Tracker changed from Bug to Feature

- Category set to libaudgui

- Status changed from New to Closed

You did not mention your version of Audacious, but it must be ancient.
This feature is already supported since version 3.6.

Sorry, I'm using 3.6.2-2 on Ubuntu Xenial. Attached a screenshot of the GTK interface, I don't see any way to choose presets there.

#3 - March 04, 2017 15:06 - Thomas Lange

Oops, you are right. It is available since 3.7.
