Affects version:	3.9			

Description

The window that provides the link to authenticate lastfm is to small and not resizeable, which causes the link to be truncated, removing some of it and replacing with ...
eg.
https://www.last.fm/api/auth?api_key=4b4f73bda1818...438604adf52&token=HM8gm2sV0VRV-QoXjBRlBHIeE1Gxoa65
This makes it useless. Workaround is to launch from terminal and use link from there
