Description	
<p>I'm on Arch Linux with KDE as my desktop environment.</p> <p>When using the GTK interface plugin, all control buttons are invisible as seen in the attached file. This happens with both the stable package and the -git version.</p> <p>Here is the audacious -VV output if it helps:</p> <pre>NFO dbus-server.cc:802 [name_acquired]: Owned D-Bus name (org.atheme.audacious) on session bus. There is a problem with your GTK+ configuration; either you don't have a usable icon theme installed (unlikely) or a configuration setting is missing/incorrect and preventing GTK+ from finding your theme. I have used both the GTK+ and Qt interfaces in KDE on Arch Linux without trouble so it's certainly a solvable problem. This page might be helpful:

https://wiki.archlinux.org/index.php/Uniform_look_for_Qt_and_GTK_applications

#2 - June 10, 2017 18:43 - Anonymous

Whoops, you're right. How do I close this?

#3 - June 11, 2017 04:12 - John Lindgren

- *Status changed from New to Closed*

Sounds like you found a solution? I'll close the ticket.
