

## Audacious - Bug #79

### Playlist not rendering properly in e16

March 11, 2012 22:14 - Topher 1kenobe

<b>Status:</b>	Closed	<b>Start date:</b>	March 11, 2012

<b>Target version:</b>	3.2.1		
<b>Affects version:</b>	3.2.1		
<b>Description</b>			
<p>I'm running Enlightenment 0.16, and ever since Audacious 3.0 my Playlist window hasn't rendered properly. It doesn't really render it all, it copies the desktop background behind it, and renders that, like a transparent terminal might.</p> <p>I have a screenshot here: <a href="http://derosia.com/wallpapers/topher_desktop_20120311170941.jpg">http://derosia.com/wallpapers/topher_desktop_20120311170941.jpg</a> When I first open it I can't see it at all, since it perfectly mirrors the desktop. I've dragged it around and you can see it because it's smeared the background.</p> <p>It's also VERY tall. I've dragged it up a dozen screen heights or so, and haven't gotten to the bottom.</p> <p>I'm running Arch Linux 64bit.</p>

I don't have Enlightenment, can you reproduce with a different window manager?

I just tried it in Fluxbox and got the exact same result. I did notice this in the terminal though:

```
Failed to load plugin (/usr/lib/audacious/Input/sid.so): libsidplay.so.1: cannot open shared object file: No such file or directory
Failed to load plugin (/usr/lib/audacious/Container/cue.so): libcue.so.1: cannot open shared object file: No such file or directory
```

Would that have anything to do with it?

No.

On a hunch, please look in `~/.config/audacious/config`, in the `[skins]` section, and check the value of `playlist_height`.

No.

On a hunch, please look in `~/.config/audacious/config`, in the `[skins]` section, and check the value of `playlist_height`.

heh, it was 44080. I set it to be 400 in the file, but when I restarted Audacious it reset the value to be 44080.

Did you make sure that Audacious was **not** running before you changed the file?

I thought I had, but apparently not. Closing out for sure and changing the size appears to have fixed all issues. How odd.

Thanks for the help. Do I mark this closed, or someone with more privs?

Let's leave the report open for a while in case the problem shows up again.
