

Audacious - Bug #86

Symbol collision: playlist_delete_selected

March 25, 2012 17:21 - Michael Schwendt

Status:	Closed	Start date:	March 25, 2012
Priority:	Major	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	3.2.2		
Affects version:	3.2.1		

Description

In the gtkui, pressing either the "Del" key or using the playlist context-menu "Cut" to delete/cut a track from the playlist fails since 3.2-beta1. Last version it worked in is 3.2-alpha1.

The Winamp gui is not affected.

History

#1 - March 25, 2012 18:41 - Michael Schwendt

- File *audacious-plugins-3.2-beta1-playlist-delete.patch* added

Done some debugging...

#2 - March 27, 2012 04:07 - John Lindgren

I am unable to reproduce. Also, will you explain the reasoning behind your patch?

#3 - March 27, 2012 10:40 - Michael Schwendt

Without the renaming, I experience symbol collision between *audacious-plugins /src/gtkui/ui_gtk.c* and */src/audacious/playlist-new.c*:

```
#0 playlist_delete_selected (playlist_num=8630720) at playlist-new.c:1425
#1 0x00007fffd242215 in playlist_keypress_cb (widget=<optimized out>,
event=<optimized out>, unused=<optimized out>) at ui_gtk.c:581
```

Reproducible on the older Fedora 16 (x86_64).

#4 - March 29, 2012 17:29 - John Lindgren

- Subject changed from *gtkui playlist "Cut" action fails since 3.2-beta1* to *Symbol collision: playlist_delete_selected*
- Status changed from *New* to *Closed*
- Priority changed from *Minor* to *Major*
- Target version set to *3.2.2*
- % Done changed from *0* to *100*
- Affects version *3.2.1* added
- Affects version *deleted* ()

`playlist_delete_selected()`, in Audacious core, is not supposed to be visible to plugins. Fixed in master (and will be backported to 3.2.2): <https://github.com/audacious-media-player/audacious/commit/ba7c575a80d9782eacff6bf2f3ad246d3fd18a68>
