Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #91

Jump to song search results do not include songs not yet scanned for metadata

March 31, 2012 22:43 - carlos lopez

Status:	Closed		**Start date:**	March 31, 2012
Priority:	Major		**Due date:**	
Assignee:			**% Done:**	100%
Category:	libaudgui		**Estimated time:**	0.00 hour
Target version:	3.2.3			
Affects version:	3.2.2			

Description

Items on queue list are not indexed by the search engine filter until metadata is read

Steps to reproduce:

- Options->Preferences->Playlist
    - Mark "Do not load metadata for songs until played"
- Close audacious
- Open with audacious a ramdom directory containing several mp3 files
- Try to search some files (pressing **j**)

Actual result: All files show on the *jump to song* dialog but no matter what you type on the search filter, it will ignore all file which metadata was still not read (all in this case)
Expected result: All files show on the *jump to song* dialog and the search filter is able to *"grep"* them using the directory/filename information until the metadata information can be added.

The same happens with audtty ncurses GUI.

I am using audacious 3.2.1 on Debian/sid

History

#1 - April 01, 2012 05:26 - John Lindgren

- Tracker changed from Bug to Feature

- Subject changed from Items on queue list are not indexed by the search engine until metadata is read to Allow searching by path/filename in search tool

Currently the search tool only searches by metadata. This is the intended behavior, not a bug.

I don't think this is true. Once audacious has read the file metadata and it indexes it, I can just search for it on the *jump to song dialog* using the

directory or file-name (any part of the path) and it just works.

You are confusing the search tool and the jump to song dialog. They are different.

#6 - April 02, 2012 22:25 - carlos lopez

Didn't know about any search tool other than the "jump to song" dialog.

I was talking all this time about the "jump to song" dialog (I am using winamp-like interface)

#7 - April 21, 2012 17:42 - John Lindgren

- Category deleted (plugins/search tool)

#8 - April 21, 2012 17:45 - John Lindgren

- Tracker changed from Feature to Bug

- Subject changed from Allow searching by path/filename in search tool to Jump to song search results do not include songs not yet scanned for metadata

- Category set to libaudgui

- Status changed from New to Closed

- Target version set to 3.2.3

- % Done changed from 0 to 100

- Affects version 3.2.2 added

- Affects version deleted ()

I misunderstood the problem, it seems. Should be fixed now:
