gio: Add error reporting

April 21, 2012 18:52 - John Lindgren

Status:	Closed	Start date:	April 21, 2012
Priority:	Major	Due date:	
Assignee:		% Done:	100%
Category:	plugins/gio	Estimated time:	0.00 hour
Target version:	3.3		
Affects version:			
Description Currently we call many GIO functions with the (GError**) parameter set to NULL. This needs to be fixed so that we can actually print error messages when something goes wrong. Once this is done, we can do further testing and consider enabling the gio plugin by default (which will close #30 and #81).
