| Target version: | 4.1 | | |
| Affects version: | 4.0.4 | | |

Description

I tried to play a music file (attached) with the lyrics plugin enabled but Audacious crashed. When I tried to re-open it, it would crash immediately without any interaction. I removed lyricwiki-qt.so temporarily and it worked.

Audacious version is 4.0.5 (not the 4.0.4 that I selected because 4.0.5 is not available).

As a workaround, disable these two options:

- "Store fetched lyrics in local cache"
- "Load lyric files (.lrc) from local storage"

I'll have a fix shortly.
