<b>Description</b>			
Like the title says, mention audtool. Make sure to describe it as an advanced/thorow cli control utility (in good English... lol).			
"audacious -h" is the most obvious thing one will try in search for cli controls. Users get the impression, that this is it.			

### History

#### #1 - December 26, 2020 21:40 - John Lindgren

- Status changed from New to Rejected

audtool is mentioned in the manual page.

#### #2 - December 27, 2020 07:27 - Anonymous

By that logic, -h shouldn't exist, since everything it displays are in the man pages. I've seen an other feature request for a new cli option, because they didn't know that audtool was what they wanted to use.
