

Audacious - Bug #1062

Audacious broke dpkg trying to upgrade to 4.1.0 (from 4.0.5)

February 05, 2021 18:16 - Kitty Linux

Status:	Rejected	Start date:	February 05, 2021
Priority:	Major	Due date:	
Assignee:		% Done:	0%
Category:	libaudqt	Estimated time:	0.00 hour
Target version:			
Affects version:	4.0.4, 4.1		

Description

I'm using Linux Mint 20 and PPA version of Audacious (ubuntuhandbook1/apps)
When I just use the command `sudo apt upgrade`, I got really weird error:

```
E: Sub-process /usr/bin/dpkg returned an error code (1)
```

And here's full output (only audacious part) after using `sudo apt upgrade`

```
...

```

with an option `--fix-broken` didn't help at all.

```
$ sudo apt install --fix-broken

```

I think it's because of trying to install new package over existing package on same path and that's why. Why not just upgrade existing package instead of new package?
