<b>Description</b>			
<p>I've noticed that the equalizer settings are quite coarse.</p> <p>They go from -12 to 12, in a unit I assume is db?</p> <p>I find that the levels are too coarse. I often want a level between 0 and +1, but the resolution of the slider is too coarse.</p> <p>I wonder if using increments of (say) 0.2 would be more appropriate? But this would probably require <a href="#">#1066</a> to be addressed too, as the window is very small and fine adjustment would be tricky.</p> <p>Thanks.</p>
