Category:	plugins/aosd	Estimated time:	0.00 hour
Target version:			
Affects version:	4.1		
Description			
I really liked the AOSD (On-screen Display) plugin, has the plugin support ended with version 4? Also, as a side note, I read that the Global Hotkeys plugin was implemented in version 4.1, but can't seem to find it. I am using Audacious from the Arch repositories.			

History

The AOSD plugin depends on GTK and has not been ported to Qt yet.

Regarding the missing Hotkey plugin:

I forwarded this to the Arch Linux bug tracker.
