<b>Description</b>			
After adding files from the disk Audacious seems to never reread them even if the underlying file and its metadata have changed. That's very inconvenient.			
Ways to approach this issue:			
<ul style="list-style-type: none"><li>• Either unconditionally reread and parse them no matter what (OS cache will help anyways)</li><li>• Reread tags only if file size or file modification time has changed (this will not be reliable but will work for 99.99% of cases)</li></ul>
