

Audacious - Feature #1101

Please add media shortcut keys for Windows 10

Description <p>Hello, I would like if you can add the ability to let me use the media keys on my keyboard to work on Windows 10. Windows 10 shows a notification for vol and media keys when pressed on video players and even the browsers. So you can use the keyboard media pause, play, skip and so on. However, with Audacious, it just shows vol and the keyboard media keys do not work with this software.</p> <p>So it kinda a pain to press on Audacious and switch or pause a song. Would be much faster if I can just switch well it's minimized. I use the Winamp Classic Interface with Osmosis layout. SO it just chills open in the corner of my right monitor in the bottom.</p> <p>Please add this, thanks.</p>

I think a win32-only plugin is the most practical solution as a replacement for the MPRIS plugin on unix. This probably doesn't need to be in the main Audacious core.
