Audacious - Feature #1128

Playlist export: preselect previously loaded playlist in file selector

October 22, 2021 10:32 - Martin Gyrtel

Status:	Closed		**Start date:**	October 22, 2021
Priority:	Minor		**Due date:**

Target version:	4.2			
Affects version:	4.1			

Description

In the Qt interface:
A new playlist is created, then a playlist from disk is imported here.
When exporting this playlist, preselect the name of the previously imported playlist in the file selector dialog.
The GTK interface already has this feature, I miss it in the Qt interface.

Fixed, thanks for mentioning it!
https://github.com/audacious-media-player/audacious/commit/1dd69cb15d0326b9c8d21fab39d66a48c089a0f7

#2 - November 19, 2021 21:14 - Jim Turner

- File fileopener.diff added

NOT fixed! - File name does not appear in text dialog box nor is that file's row highlighted (though the latter looks more like a Qt "feature" perhaps?). I ended up having to do the following (from libaudqt/file-entry.cc) in order to get this to work in Audacious (the filename to appear in the text dialog box) - see attached diff file! I'm using latest Aud git a/o 11/19 with Linux Debian Bookworm (testing) & Qt v5.15.2.

I can file a new bug if you wish.

Regards,

Jim
