<b>Target version:</b>			
<b>Affects version:</b>	3.10.1		
<b>Description</b> <p>MusicBrainz (MB) is a music database that contains, most of the time, better quality tracklists for CD, than CDDB/FreeDB/GnuDB. Querying MB would require computing a disc ID with <a href="https://musicbrainz.org/doc/libdiscid">https://musicbrainz.org/doc/libdiscid</a>. GnuDB.org could be kept as fallback.</p> <p>MB support could also be extended to non-CD, we could for example lookup the release we want to tag with pasting its MB URL: <a href="https://musicbrainz.org/release/aaa6fe6f-bb5b-4c57-ba94-181d6c9c7c73">https://musicbrainz.org/release/aaa6fe6f-bb5b-4c57-ba94-181d6c9c7c73</a></p>
