Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #1147

Overwhelming error dialogs

January 06, 2022 23:28 - Wahb Stellar

Status:	Closed		**Start date:**	January 06, 2022
Priority:	Trivial		**Due date:**

Target version:	4.2			
Affects version:	4.1			

Description

I use an external hard drive to store most of my music. This hard disk isn't set to automount, so if I open Audacious and haven't mounted the drive I get 10 errors instantly that stop me from doing anything until I have mashed space 10 times (and if you hit 11 you open 10 more errors as it tries to load 10 more songs it can't find).

A few solutions I could think of are to compile all subsequent errors into a single dialog like what Foobar2000 does. If that isn't possible even an option to disable errors altogether would work well for me, I could not find anything like this in settings. Or perhaps being able to configure the amount of songs it will skip before stopping, like 3 instead of 10, which would just make the issue more manageable

We have some logic to handle this in the legacy GTK interface. It just needs to be ported to Qt.

#2 - January 08, 2022 03:06 - John Lindgren

- File errors.png added

Fixed by https://github.com/audacious-media-player/audacious-plugins/commit/94453feaeb610043ae9f6a36bc47c7e49b0d4563.

Screenshot of what it looks like now attached (I can't get the image to embed for some reason).

#3 - January 08, 2022 03:11 - John Lindgren

- % Done changed from 0 to 100

- Status changed from New to Closed

- Category set to plugins/qtui

- Tracker changed from Feature to Bug

#4 - February 05, 2022 22:22 - John Lindgren

- Target version set to 4.2
