

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #1149

Do not automatically change the output plugin on error, stop playback instead

January 23, 2022 11:19 - Artem S. Tashkinov

Status:	Closed	Start date:	January 23, 2022
Priority:	Major	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	4.2		
Affects version:	4.1		
Description			
<p>This has been driving me insane recently.</p> <p>I've got the only output device: my Bluetooth headphones, whenever I power them off, I have no output devices any longer. My default output plugin is set to Pulse Audio.</p> <p>What happens when I try to play audio in this case is that Audacious chooses the next available output plugin automatically, it's FileWriter here, so I end up with dozens of written files on the disk which I do not want.</p> <p>Please add an option to stick to the chosen output plugin and shut down playback completely in the case the output plugin throws an error.</p> <p>Thank you.</p>
