

Audacious - Bug #1157

Winamp interface: after removing current item, playlist scrolls to the top

February 24, 2022 20:17 - vyachelsav ruban

Status:	Closed	Start date:	February 24, 2022
Priority:	Major	Due date:	
Assignee:		% Done:	100%
Category:	plugins/skins-qt	Estimated time:	0.00 hour
Target version:	4.2		
Affects version:	4.1		
Description			
After removing current item (white in default skin) and pressing up or down TWO times focused item jumps to top of list. It should stay where it was after delete and first press.			

History

I can't reproduce this.

John Lindgren wrote:

I can't reproduce this.

Steps to reproduce:

- Switch to winamp interface, default skin
- Add 10 or more files to playlist
- Start/stop playing any file in the middle of list. It becomes current (white).
- Delete this white item using "delete"
- Press "up" first time.
- Press "up" second time. After second press cursor item jumps to top of list.

But I did. Just a moment ago in 4.2-beta from AUR. 3 different playlists, 3 times it happened the way the man said. But it only works if the option "jump to next track if the current one is removed" is disabled.

- Category set to plugins/skins-qt
- Subject changed from *Winamp interface: after removing current item from playlist focused item should jump to top of list* to *Winamp interface: after removing current item, playlist scrolls to the top*
- Tracker changed from Support to Bug

Thanks for the additional info. With your clue about disabling "Advance when the current song is deleted", I do see an issue where the playlist scrolls to the top after deleting the current item. Probably "focused item jumps to top of list" was just a poor choice of words, and it's the same issue.
