Are you using the old XEmbed tray implementation or something D-Bus based? Scrolling will likely only work with XEmbed.

#2 - March 17, 2022 12:42 - John Lindgren

Does scrolling on other Qt based status icons work?

#3 - March 19, 2022 13:17 - Heitor Rojas

I wanted to test both Audacious version (Qt and Aur Gtk3).
I don't have any other Qt app so i can't tell you about other Qt status icons.
I went back to the Gtk version witch is better in my Xfce environment. I prefer the Ctrl+F in Qt version but i know and understand that news GUI features will not be added to gtk version.
Thank you.

I believe this is probably due to a limitation in the tray icon protocol or panel implementation. If you do find that scrolling works in another Qt 5-based application, please let us know.

Closing.
