Audacious - Feature #1174

Make the file path in the "Song Info" window selectable text

July 24, 2022 14:51 - N Q

Status:	Closed		**Start date:**	July 24, 2022

Target version:	4.3			
Affects version:				

Description

When wanting to add tags to a song, one might go in the Song Info dialog and naturally want to copy title and artist from the file path on the left and paste them in the corresponding fields on the right.

It is possible to right click on the file path and copy it, but the path is URL-encoded (at least on Linux), making any non-ASCII character be unreadable and it is impossible to copy only a part of the path this way.

History

Please add a screenshot to clarify. I don't see URL-encoded file paths in the song info dialog.
Also are you using the Qt or GTK interface?

#2 - July 27, 2022 01:18 - N Q

- File Audacious_song_info.jpg added

Please disregard the second sentence of this bug report. I am using the Qt interface. I am talking about selecting the artist on the left, pressing Ctrl+C, and then doing Ctrl+V in the Artist field on the right, see screenshot.
