

Audacious - Bug #1179

Length of ffaudio-handled streams from #1160 & #1176 are the dreaded "419:57:08" instead of zero.

Affects version:	4.2		
Description			
This is a follow-on to closed Issue #1160 , and perhaps #1176 , discovered during testing of both. Streams not being set to zero length. Here's a patch that has seemed to work well for me from some other code for quite some time now for both continuous and time-limited streams, and files.			

History

#1 - August 08, 2022 17:53 - Jim Turner

- File ffaudio-core.cc.diff added

Oops - I had been using "if ((int)ic->duration != 0)" forever, but when looking it it here I suddenly thought that negative duration values didn't make sense so I changed it to "if ((int)ic->duration > 0)". I then discovered a case where it DOES, and reverting it back to the former works returning the correct time, so updated the attachment here.
