Audacious - Bug #1179

Length of ffaudio-handled streams from #1160 & #1176 are the dreaded "419:57:08" instead of zero.

August 08, 2022 01:08 - Jim Turner

Status: Closed
Priority: Minor

Target version: 4.3
Affects version: 4.2

Description
This is a follow-on to closed Issue #1160, and perhaps #1176, discovered during testing of both. Streams not being set to zero length. Here's a patch that has seemed to work well for me from some other code for quite some time now for both continuous and time-limited streams, and files.

History

#1 - August 08, 2022 17:53 - Jim Turner
- File ffaudio-core.cc.diff added

Oops - I had been using "if ((int)ic->duration != 0)" forever, but when looking it it here I suddenly thought that negative duration values didn't make sense so I changed it to "if ((int)ic->duration > 0)". I then discovered a case where it DOES, and reverting it back to the former works returning the correct time, so updated the attachment here.
