Affects version:	3.2, 3.2.1, 3.2.2, 3.2.3			

Description

In kubuntu 12.04 x64 and audacious 3.3, the volume is no longer controlled by the mouse wheel on main skinned window, where it did in 11.10. apparently due to the GDK_SCROLL_SMOOTH event in
GTK+ 3.4. Also, tilt wheel left and right no longer advance and rewind by 5 seconds.

The mouse wheel controlling the volume still works on the status bar icon.
