Audacious - Bug #12

Volume changes (using software volume control) are not instantaneous

December 20, 2011 19:18 - Artem S. Tashkinov

Description

I hope this issue will be fixed some day.

I don't use any audio effects plugins (but even in this case most audio players have no problem with this functionality).

- Status changed from New to Rejected

This has been discussed before and is not going to be fixed. Software volume control by its very nature is applied with a delay, because it is applied to the audio data **before** it enters the output plugin. Hence it is recommended to use the output plugin's volume control instead.
