<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Affects version:</b>			
<b>Description</b>			
I want to change the command on choosing Edit Lyrics ... on the Lyrics window from opening the default browser on url like <a href="https://lyrics.fandom.com/index.php?action=edit&amp;title=Neil_Young:The_Great_Divide">https://lyrics.fandom.com/index.php?action=edit&amp;title=Neil_Young:The_Great_Divide</a>			
lyrics.fandom.com is closed and LyricsGenius is absolutely excellent			
how and where do I change that command to			
\$ python3 /home/kroon/lyrics.py "Neil Young" "The Great Devide" "/media/local/TUNES/Neil Young/Silver & Gold/The Great Divide.mp3"			
lyrics.py writes the found lyric to a flat text.lrc file with the same file path as the mp3, so it will show in Audacious Lyrics window.
