

Audacious - Bug #124

A declared dependency version of cdaudio-ng seem to be incorrect

June 10, 2012 02:55 - Luís Picciochi

Status:	Closed	Start date:	June 10, 2012
Priority:	Minor	Due date:

Target version:			
Affects version:			

Description

The configure.ac file states that the minimum required version of libcdio is 0.70, but when compiling, the cdio/cdio_unconfig.h file seems to be needed.
This file is not available at least until version 0.81 of the libcdio-dev package (in Debian). After installing version 0.83, everything went fine.

Attached is additional info on what I saw when trying to compile and what I did to fix it.
Also attached is a simple patch to fix this issue. I only increased the requirement for the relevant dependency. Probably the other, libcd*-related ones should also be increased but I'm not sure of that.

Best regards,
Pitxyoki
