Category:		Estimated time:	0.00 hour
Target version:			
Affects version:	3.3-beta1		

Description

audacious fails to open .asf streams (version 3.3 crashesh on opening). Here is an example of such stream :

<http://streaming.bnr.bg/Horizont>

All other gnome players (totem rhythmbox..etc) can open this.

History

- Status changed from New to Rejected

The .asf file is self-referencing (i.e. recursive), so no wonder it does not play! Anyway, I cannot reproduce any crash. Closing.
