Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #145

Audacious titlebar icon missing

July 07, 2012 11:13 - F.J. de Pablos

Status:	Rejected	**Start date:**	July 07, 2012
Priority:	Minor	**Due date:**

Category:		**Estimated time:**	0.00 hour
Target version:			
Affects version:	3.0, 3.2.4		

Description

I'm using Ubuntu 10.04.2 LTS with the openbox window manager, I've compiled audacious 3.0/3.2.4 and the titlebar icon is missing (it's replaced by the generic openbox icon)
The icon theme I'm using doesn't have an audacious custom icon.
The audacious.desktop file is ok.
If I enable the tray icon, it does work properly.
I don't have that issue with any other application.

The only workaround I've found so far, is to copy the audacious.png icon installed in /usr/share/icons, into the folder of the icon theme I'm using (/home/user/.icons/Humanities-Green/apps/48)

Screenshot attached below.

Excuse me, I meant:
The only workaround I've found so far, is to copy the **audacious.png** icon located in /**usr**/**share**/**pixmaps**, to the folder of the icon theme I'm using.

What prefix did you pass to ./configure? Normally Audacious installs icons into /usr/share/icons/hicolor, but not if you used the wrong install prefix.

#3 - July 07, 2012 16:12 - F.J. de Pablos

I always use /usr as prefix, cause most programs use /usr/local as default, never had a problem with that. Manually copying the icon to /usr/share/icons/hicolor or /usr/share/icons/hicolor/48x48/apps does nothing.

#4 - July 07, 2012 16:27 - John Lindgren

- Status changed from New to Rejected

This is a bug in OpenBox or in your theme definition then; OpenBox should fall back to the icons in /usr/share/hicolor if your theme does not contain what it needs. See http://icon-theme.freedesktop.org/wiki/HicolorTheme/.
