<b>Affects version:</b>	3.3.1		
<b>Description</b> Hi, could you modify this function for X key on keyboard during playback or is it possible to change it by me? When I am listening a music and I press X then nothing happen. So could include a function to start the same song again from the beginning when I press X during playing a song? Sometimes I used it in winamp and it is very useful.  Thanks.  Dusan

You can change this with the "Global Hotkeys" plugin.

No, that would be a bad idea. Then you would not be able to type 'x' in any program.

- Subject changed from *New option when I press X key on keyboard...* to *Make 'x' keybinding restart playback from beginning of song*

##### #4 - August 30, 2012 01:41 - John Lindgren

- Category set to *core*

- Status changed from *New* to *Closed*

- % Done changed from *0* to *100*

This feature "fell through the cracks" when I was implementing the playlist resume feature for 3.3, but it should work again now:
