

Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #198

Segmentation fault on adding bogus non-MP3 file to playlist

October 17, 2012 15:59 - Mark -

Status:	Rejected	Start date:	October 17, 2012
Priority:	Minor	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Affects version:	3.2.4		
Description <p>I'm using Audacious 3.2.4 on Lubuntu 11.10 x86-64. I noticed that when adding a bogus/fake non-MP3 file to a playlist, Audacious crashes with a segmentation fault.</p> <p>Create the fake file: echo sklslglkfjfg >test.mp3</p> <p>Running audacious -V, output on adding that to a playlist looks like this: VFS: <0x158fe60> open (mode r) file:///home/user/path/to/file/test.mp3 VFS: <0x158fe60> seek to 0 from end VFS: <0x158fe60> tell = 13 VFS: <0x158fe60> seek to -128 from end Segmentation fault</p>			

History

#1 - October 17, 2012 16:03 - Mark -

If I enable the "Do not load metadata for songs until played" option, Audacious does not crash when I add the fake file to a playlist. It does crash when I right-click the playlist entry and select "Song Info...", however.

#2 - October 19, 2012 14:29 - Mark -

I just tested Audacious 3.2.3 (as on the Lubuntu 12.10 disc). That doesn't crash, but the behaviour is less than ideal.

On adding the bogus file to a playlist, a dialog box appears saying "lseek failed: Invalid argument."

Console output when that happens:

VFS: <0xb4000d20> open (mode r) file:///home/lubuntu/test.mp3

VFS: <0xb4000d20> seek to 0 from end

VFS: <0xb4000d20> tell = 11

VFS: <0xb4000d20> seek to -128 from end

mpg123 probe error for file:///home/lubuntu/test.mp3: Message: I am done with this track.

VFS: <0xb4000d20> close

util.c:83 [audgui_simple_message]: lseek failed: Invalid argument.

The file does actually get added to the playlist. On double-clicking it or right-clicking and selecting Song Info you get the lseek failed dialog again.

#3 - November 11, 2012 20:57 - John Lindgren

Is this still a problem in the current version (3.3.2)?

#4 - November 18, 2012 21:04 - John Lindgren

- Status changed from New to Rejected

I cannot reproduce a crash in Audacious 3.2.4 or 3.3.2. Please compile either version from source and then attach a backtrace of the crash. Alternatively, ask your distribution maintainers for support. We do not provide support for 3rd-party packaged binaries.
