

Audacious - Feature #230

Headless mode enhancements

December 26, 2012 20:31 - Byron Stanoszek

Status:	Closed	Start date:	December 26, 2012

Target version:	3.4		
Affects version:	3.3.3		

Description

Please add the following enhancements to headless mode:

A command-line flag to enter Repeat mode for the entire list of files specified on the command-line.

Pressing Control-C skips to the next song in the playlist; pressing Control-C twice within one second quits Audacious. This is how the "mpg123" (MP3 Player) command behaves, and I thought this was a decent way to catch the only real signal needed from the command-line.

Allow headless mode to automatically Quit Audacious after the last song specified on the command-line has finished playing (when not in Repeat mode).

History

audtool already has options for controlling repeat and skipping to the next song. An option to quit at the end of the playlist could be useful, though.
