Audacious - Bug #282

Use AC_CONFIG_MACRO_DIR in configure.ac

April 22, 2013 10:38 - Michael Schwendt

Status:	Closed		**Start date:**	April 22, 2013
Priority:	Minor		**Due date:**	
Assignee:			**% Done:**	100%
Category:			**Estimated time:**	0.00 hour
Target version:	3.4			
Affects version:	3.4-beta1			

Description

Define m4 macro directory to make autoreconf work with defaults. Tested with Autoconf 2.69.

Without this, the macros in m4/buildsys.m4 are not found and not included, and one would need to add option -I m4 when running autoreconf (or the individual autotools).

History

#1 - April 22, 2013 10:45 - Michael Schwendt

- File audacious-plugins-3.4-beta1-m4-dir.patch added

Also affects plugins package.

#2 - April 23, 2013 02:31 - John Lindgren

- Status changed from New to Closed

- Target version set to 3.4

- % Done changed from 0 to 100
