Audacious - OLD, PLEASE USE GITHUB DISCUSSIONS/ISSUES - Bug #289

MPRIS 2 plugin sends a stupid mpris:trackid

May 11, 2013 19:14 - Mantas Mikulėnas

Status:	Rejected	**Start date:**	May 11, 2013
Priority:	Minor	**Due date:**

Category:	plugins/mpris2	**Estimated time:**	0.00 hour
Target version:			
Affects version:	3.3.4		

Description

The MPRIS2 plugin should use mpris:trackid's that uniquely represent the current track.

Currently, it sets the mpris:trackid property for *all tracks* to the same value, /org/mpris/MediaPlayer2/CurrentTrack. This means MPRIS2 clients have no reliable way of knowing if a different track is being played, or if it just had metadata updated, whenever they receive a PropertiesChanged(Metadata) signal; they now have to guess based on URL and other metadata.

(Audacious does not have to actually export the trackid as a DBus object – it's enough to generate valid object names.)

- Status changed from New to Rejected

I thought we had a report of this already but I can't find it now.

Audacious is a lightweight player and does not maintain unique IDs for individual tracks, so this MPRIS2 feature will not be implemented.
