Target version:				
Affects version:	3.3.4			

Description

There is an menu item in the GTK interface titled "Repeat", but it seems that it functions as "repeat playlist". It's a little bit confusing to have a button named "Repeat" but repeats the whole playlist. Would you please add a button and a menu item to distinguish between "repeat single song" and "repeat playlist"? Thank you very much.

- Status changed from New to Rejected

If you check the "No playlist advance" option then only the current song will be repeated.
